**President Barack Obama  
The White House Staff  
The U.S. Senate  
The U.S. House of Representatives**

# Help Stop & End The Madness!

**Health Care Reform - Cap & Trade - Deficits - Taxation**

Just to Name a Few...

- These issues are too important to every American's future to rush to conclusions!
- The perception out here in the **Real World**, is that you could destroy our country and our very way of life that we have worked so hard to achieve!
- Forget about Mr. Obama pushing you for a decision before your recess. Go back home and talk to people you represent and get their input! You are losing support for everything!!!
- Take some time to do research on health care reform. For Example, watch for the Cinergy Health commercials on TV or check them out at [www.cinergyhealth.com](http://www.cinergyhealth.com). We do not represent them, but if having health care coverage is this easy and inexpensive, what are we trying to do?
- I have owned and operated a small business in Uniontown, Ohio for nearly 35 years. We are one exit North of the Akron/Canton Airport and I open my doors to all of you to come, sit down and talk about the reality of what is going on out here. We will even pick you up at the airport to cut expenses and save taxpayer dollars. You should bring a jacket if you come for a visit because we are having a cool summer in Ohio. There is no **Global Warming** going on here!
- When we talk, let me tell you about some key advice that I am giving to my family, employees, agents, clients, companies and vendors. Let me tell you about everything being a moving target out here and why there has never been a more important time for families and businesses to adopt a **Wait and See Attitude!** This also prevents the economy from having a quick recovery.
- Also, let me share with you why you can't depend on the 79 million Baby Boomers, which I am one of them, to spend us out of this economic meltdown.

**I look forward to our personal discussion!**
